[54] INSTANT COMMUNICATION SYSTEM 一種即時通訊系統

[57] An instant communication system comprising an instant communication server (1), a plurality of mobile terminals (2), and a communication network (3) is provided; the instant communication server includes an instant communication server processor (5) and an instant communication server memory (6) electrically connected to the instant communication server processor; each of the mobile terminals includes a terminal central processor (7), a terminal communication processor (9), a display unit (8), a terminal memory (10), and at least one information storage unit (4) configured for storing telephone attribute information; the terminal central processor is electrically connected with the display unit and the terminal communication processor respectively; the terminal communication processor is further electrically connected with the information storage unit to obtain the CID. The following advantageous effect can be achieved: communications using different phone numbers of one mobile terminal can be distinguished from each other.

一種即時通訊系統包括即時通訊伺服器(1)、多台移動終端(2)和通訊網絡(3);所述即時通訊伺服器包括即時通訊伺服器處理器(5)以及與該即時通訊伺服器處理器電性連接的即時通訊伺服器記憶體(6);每台所述移動終端包括終端中央處理器(7)、終端通訊處理器(9)、顯示單元(8)、終端記憶體(10)與至少一個用於固定存儲電話屬性資訊的資訊存儲單元(4);所述終端中央處理器分別與所述顯示單元、所述終端通訊處理器電性連接;所述終端通訊處理器還與所述資訊存儲單元電性連接;所述多台移動終端均通過所述通訊網絡與所述即時通訊伺服器建立通訊;本實用新型具有能將同一台移動終端的不同電話號碼的通訊相區別的有益效果。
